

## Progress Report – October 2023

I wanted to update you on the progress I've made this month on the project.

Here's a quick summary:

### 1. Home Page:

- Created the home page, the starting point for users.
- Focused on making it user-friendly and welcoming.

### 2. Login Page:

- Implemented the login page.
- Users can securely access their accounts.

### 3. Find Peers Page:

- Developed the "find peers" feature.
- Users can discover potential gaming partners based on personality traits and favorite games.

### 4. Add Game Page:

- Worked on the "add game" feature.
- Users can update the games they play.

### Challenges:

While I've made good progress, integrating the front-end with the back end presented some technical challenges. I've been addressing these issues and learning along the way.

### Next Steps:

In the coming month, I plan to work on user registration, personality quizzes, and further enhance the user interface. Backend development is also underway to ensure a smooth experience.

Looking forward to your feedback.
